CTP Pro is a powerful application that allows you to create complete animated series. The application is designed to produce and import images, video and audio content from your computer and its memory cards. The main advantage of CTP Pro is that it can be used to produce complex animations, composed of a number of layers. The storage sheet can be used to design the backgrounds, animation and the different elements used to create the project. You can then add the necessary elements to the Exposure Sheet, where you will be able to create the story and compose the different scenes. Moreover, it is possible to add sounds and create additional elements using the Exposure Sheet, which can be used to create the soundtrack. CTP Pro is a complex program, but the application does offer an extensive amount of documentation that can be very helpful for new users. The application can be used to create stunning anime series. CTP Pro Specifications: Category: Multimedia; File Type: Mac OS X; Find your perfect Mac or Windows PC, HP, Apple, Alienware, Dell, and Lenovo parts in one place.
