**What's New in the?**

✔ Do you love solving math problems? Do you like to know what the relationship between mass and speed is? Do you want to be able to calculate the power of a magnet? Mass & Spring is a simulation tool that will offer you a realistic mass and spring laboratory. Hang masses from springs and adjust the spring stiffness and damping. You can even slow time. Transport the lab to different planets. A chart shows the kinetic, potential, and thermal energy for each spring. This application will let you explain the Conservation of Mechanical Energy concept using kinetic, elastic potential, and gravitational potential energy, use your understanding of how a spring scale works to determine the mass of an unknown object, find the value of g on Planet X. ✔ Do you love solving math problems?
