this, it provides easy customization of the app's features to suit a wide array of target applications. As such, it allows construction sites and their logistical aspects to be easily and effectively organized and planned. Description: SE-Builder is a construction project management application that provides users with many of the aspects that go into the actual running of a building or site. In addition to this, it provides easy customization of the app's features to suit a wide array of target applications. As such, it allows construction sites and their logistical aspects to be easily and effectively organized and planned. Description: SE-Builder is a construction project management application that provides users with many of the aspects that go into the actual running of a building or site. In addition to this

System Requirements:

Version 1.7 - Fixed an issue where z-fighting would occur at the end of a two-way transition when rendering at a high poly level. Version 1.6 - Fixed an issue where playback would stop while applying keyframes. - The playhead will now skip to the next frame when a new set of keyframes is applied. - Added a visual cursor for the playhead. Version 1.5
