(ii) Related Art An image forming apparatus employing an electrophotographic method forms an image on a recording material such as a sheet or a belt using a laser beam that is outputted from a semiconductor laser. The image forming apparatus also forms an image on a recording material using a fixing device that applies heat and pressure to a recording material bearing an unfixed toner image on its surface. The fixing device includes a fixing roller that constitutes a heating portion and a pressure roller that constitutes a pressing portion. A recording material bearing an unfixed toner image passes between the fixing roller and the pressure roller and is heated and pressed to fix the unfixed toner image on the recording material. Further, there has been proposed a fixing device that includes a fixing belt having an elastic member on a surface thereof that contacts the pressure
