AutoCAD has emerged as the industry leader in the desktop CAD market, and it accounts for more than 50 percent of the total CAD market. One estimate suggests that AutoCAD has displaced DraftSight as the leader in the market for drafting software. AutoCAD has a wide variety of applications, including the following: design and drafting, architecture, interior and exterior design, space planning, industrial design, piping, civil engineering, landscape architecture, mechanical and electrical design, mechanical engineering, electrical engineering, and ship design. AutoCAD is the industry leader in 2D drafting and has been used in hundreds of thousands of projects. AutoCAD also serves as the platform for a wide variety of 3D CAD products. Some analysts and publications have referred to AutoCAD as the "AutoCAD Bible." Many users prefer AutoCAD to competing CAD applications because of the ease of use, platform independence, and the wide variety of applications for AutoCAD. In addition, AutoCAD has the same price for professional

users as the other CAD applications, which means users do not have to purchase additional software for various use scenarios. This allows users to focus on their design projects and not have to deal with how to pay for additional software. History AutoCAD began as two companies: Brain Design, Inc. and the Center of Advance Design (CAD). Brain Design, Inc. was founded by Chuck Barstow, the founder of CAD. Brain Design, Inc. had a product called Elite, which was a product that ran on a computer, rather than a graphic terminal. It was designed to be easier to use than the competing products. Brain Design, Inc. was acquired by Autodesk in August 1987. Barstow became a member of Autodesk's board of directors. In 1988, AutoCAD was introduced as a separate company. AutoCAD 1.0 was released in December 1988. It was developed on the Windows platform and was designed to be user-friendly. The first version was a DOS-based application. The next version of AutoCAD was released in April 1989 and used the DOS-based Microsoft Windows graphical user interface. AutoCAD 2.0 was released in July 1989. It added multi-user, multi-platform, and DOS-based support. New features include standard and direct

drawings, input drawing, visual editing tools, nondestructive editing, and support for Windows. The AutoCAD 2.

Isro wants to build 1000 satellites in 2020 “By 2020, India will have built a satellite for every square kilometre on the earth,” said Dr K Radhakrishnan, Director of Isro’s Space Applications Centre (Isacs), Chennai, on Saturday. The mission could be a sign that India has received co-operation from other nations to build the constellation of satellites. “I think the international community is ready to support India’s space initiative,” said Radhakrishnan. India’s first satellite was launched by Russia in 1975. It sent a set of images to the Department of Space in New Delhi. The satellite paved the way for launching “better pictures of the earth”, Radhakrishnan said. Today, India is the third biggest launch centre in the world, and has the world
