Run "autocad.exe". Type in the keygen, if it is okay, click the generate button, a "packet" will be generated. Run the "packet". . Extract the "packet" into your Autodesk directory, you'll see a file called "pk3" there. . Open the pk3 file with an editor and copy the data under the section "Data" to a text file. . Use a.bat file to unpack the file by creating an autocad.cfg and putting this code there (that was cut from the autocad.cfg file): autocadcfg.exe -packer=autocadpacker.exe -c=copydata.txt -d=data.txt . Run your.bat file. The program will create a file called "new.ds" in the Autodesk Autocad directory, which you can edit. . Edit the "new.ds" file and remove the "at" from the line "" . . Save the "new.ds" file and close Autocad. You can then use it as a key. Step 3 - How to load the key into the Autodesk project . . Open Autocad, open the project where you've stored the key. . . Create a new drawing from the key. . . Note: If you want to make a second copy of the key, you need to copy everything under the section "" to another Autocad.ds file. . . Step 4 - How to load the key into the Autodesk project . . Create a new drawing from the key. . . Open the file in a text editor and copy the data under the section "" and paste it into a file called "pk3_new" in the Autocad Autodesk directory. This file can be edited. . . Step 5 - How to copy the project (load the key)
