The Soul of Eleanor Rigby The Soul of Eleanor Rigby is a 1976 novel by Anthony Burgess, an American author of science fiction and spy fiction. The novel was published in the United Kingdom by Martin Secker and in the United States by Knopf. The book was in the top 10 bestselling British novel of 1976. The novel tells the story of James Chancer, a former spy in East Berlin, and the events that occur after he is killed during a getaway by his security team. The title of the book is a reference to The Beatles' song "Eleanor Rigby" from their 1967 album Sgt. Pepper's Lonely Hearts Club Band. Plot summary Chancer is a retired spy in West Berlin. In his line of work, he was a consultant to the East German Ministry of State Security. After his retirement, he continues to work for a smaller and less powerful organization as a freelance consultant. He occasionally does work for U.S. and British Intelligence. He is taken away in a helicopter after his flight leaves the landing area and he is blown up by a grenade explosion. The only thing he manages to see before his death is the face of his contact, Colonel Roderick, who survives the attack but is badly wounded. As he gets up, he notices that the grenade has not gone off. Chancer realizes that he is "being sent to sleep" by his security team, which is trying to protect him from harm, as he is involved in sensitive work. While he is in this state, his contact, Colonel Roderick, tries to reach him through an encrypted intercom to tell him that he has been double-crossed by his East German contact. The phone line is later traced to the security firm that employs Chancer's team, and the firm is being watched by the KGB. Chancer wakes up in Moscow on a train, and the story goes on from there. The book ends with him making a telephone call from Moscow to a number in London. Removal of aliphatic hydrocarbons from the crude oil fraction from wellhead or reservoir by nonaqueous phase liquid flotation. Aliphatic hydrocarbons as a major component of crude oil cannot be separated from water-in-crude by conventional oil-water separating equipment. In order to remove aliphatic hydrocarbons from the crude oil fraction, a novel approach was proposed which involved taking the crude oil fraction from a wellhead or reservoir as the raw material and dewatering it by flotation treatment. The flotation can be assisted by air entrainment and a surface active agent, and a mineral or oil concentrator can be used as the flotation agent. The kinetic and equilibrium data show that the successful application of this flotation process is associated with the optimal selection of the diameter and depth of the flotation cells, of the particle size of flotation agent, and of the amount and reaction time of the flotation agent. The real content of aliphatic hydrocarbons in the heavy oil fraction of the crude oil is gradually increased by flotation treatment. Flotation is a novel technique suitable for industrial application and provides a new method for the development and utilization of crude oil.This article is from the archive of our partner. What an exit interview. After leaving the White House, former Press Secretary Sean Spicer gave an interview to CBS' "Sunday Morning" that may as well have been a goodbye party for the Trump administration. Spicer described what it was like to work for Trump, said Trump could just destroy you if he wanted to, joked about a Trump-Nicholson "Teen Wolf" crossover, revealed he's an avid Blizzard player, and basically gave himself a standing ovation for his time as the man who was "gruff, he was fantastic, he was inspirational, he was straightforward, he was honest, and he was direct." He also called the president a "victim" in the process of being treated like a victim. The interview was, it must be said, kind of amazing. "He would go out and he would go to these rallies and he would be the person who was standing there and interacting with the president, Sean Spicer," said "Sunday Morning" host Charlie Rose. Spicer, you might have noticed, was kind of an amazing speaker. Let's watch. That doesn't sound like a man who didn't want the job, but maybe just wasn't in the best place to do it. I love Spicer's delivery
