A vanguard system and a class system improved from the previous version of Elden Ring. With these systems, your character can be customized according to play style.

Powerful weapons and armor must be improved to overcome the seemingly impossible strength of many foes. New forms of combos, status effects, and useful tools have been introduced to increase your tactical strength.

Enchanting is, of course, another key element. The game contains countless possibilities as you develop new arts. Moreover, enchanted items can change depending on the strength of the Party Member using them.

A previously exposed "Lokraning" system has been upgraded to an all-new "Megaten" system. Being able to meet those who, in the past, could only have been reached through real-time, seamless communication is now possible, which makes the connection between the game and the latest news server even better.
