try something cheaper but still have decent sound quality. A better understanding of dynamics with headphones, a finer reward for my attention, and overall greater precision are some of the things I would be able to achieve with better speakers. A: Looks like they are going to announce the next generation of the Sony Walkman lineup in October of 2011. :) Q: How can I create a custom type of Expander in C# I'm creating a form using the Expander control in C#. I'd like the resulting form to have two sections, and I'd like the form to be expandable to show and hide the second section (by clicking on the white border of the Expander button). Right now I'm creating and showing/hiding the second section with a button, but I'd like to use an Expander control (as this seems more convenient). Expander expander = new Expander(); expander.Header = "Sub-Section 1"; expander.Content = "Some content"; expander.Name = "SubSection1"; expander.ShowButton = true; expander.Expanded += new EventHandler(expander\_Expanded); this.Expanders.Add(expander); How can I hide the expander after the second section is created and show it again after the first one is hidden? A: You'll have to put a few controls in between each expander, in addition to the expander itself. One for a border, one for the header, etc. However, the Expander class is a really nice UI object. I think it will be a lot more than you're planning. This 6d1f23a050
