Keymacro is a universal software that works on all modern operating systems. Keymacro has a very simple and intuitive interface. Keymacro can work on two levels. Keymacro can also use the keyboard shortcuts when creating or editing a macro. It is very easy to start 2edc1e01e8

RClipStep Crack +

RClip is a software that enables you to organize your Clipboard in a more effective fashion, with support for 64 and 32 bit operating systems. Use on any machine This utility is portable and therefore, the installation process is not a necessity. You can place the program files to a removable data device, such as a USB flash drive and take it everywhere with you, and use it on the fly. Aside from that, you should also know the Windows registry and Start menu/screen are not going to suffer any changes, and no leftovers will be left behind by RClip. Intuitive environment The UI is pretty non-obtrusive, as the app goes in the system tray from the first launch. Moreover, it is simple and intuitive, allowing all user categories to easily access all the available options through a pretty large context menu. This program enables you use the classical keyboard shortcuts to copy and paste information from one place to another, namely “Ctrl+C” and “Ctrl+V.” Aside from that, you can preview elements sent to the Clipboard, or delete them with just a click of the button, as well as also store them to the hard disk. A name can be assigned to the clip, and it is also possible to edit it or search for one by simply providing the utility with a keyword. Search results are shown in a new window, along with number, content, name and modified date and time. Bottom line In conclusion, RClip is a simple, yet very useful piece of software which enables you to handle Clipboard with more ease. It has a good response time, the interface is intuitive and its CPU and memory usage is minimal, as it is detected by the operating system as a background process. GenieClipper is a Java application that allows you to Clip Text, Images and even Pages from your PDF files. It is a very powerful application that can be used for various purposes. A very good example is that it is used for clipping text from a PDF file (along with images) to Microsoft Word files. Clipping text from a PDF file to a Microsoft Word document is something that many people may be interested in. However, it requires an additional program for the process to be done. GenieClipper is a Java application that is free and can be downloaded here. It allows you to Clip text, images and even Pages from a PDF file. The application can also be used to
