Quote: System Junk Cleaner ActiveX is a small software utility that can be integrated into your personal applications. It provides users with a DLL controller, enabling them to rapidly find and remove unnecessary files from their computer to free up space. The software is equipped with advanced options that enable users to easily configure clean settings. You can start by creating the cleaning scope. It covers system temporary and application junk files, recent documents, net and print hood, system logs, and thumbnail cache. You can make a custom selection and skip files by taking into account their attributes: system, hidden, read only, zero size. On the Results tab you can narrow down search results by filtering file types, like.tmp,.temp,.old,.dmp,.chk,.swp,.err,.diz and.wbk. Apart from the fact that you can either send to the files to Recycle Bin or permanently remove them from the computer, there are no other noteworthy options provided by this tool. It didn't put a strain on the overall performance of the machine in our tests, thanks to the fact that it required low CPU and RAM to work properly. No error dialogs popped up, and it didn't hang or crash. System Junk Cleaner ActiveX is a tiny software utility that can be integrated into your personal applications. No error dialogs popped up, and it didn't hang or crash. A: The software name might be "System Junk Cleaner ActiveX" or "Junk Cleaner", you will see the name of the software in the window title. Also worth noting that though "Cleaner" and "Junk Cleaner" are both correct English language names, they are also often used to refer to software with names unrelated to "Junk Cleaner". For example, "CleanerPro is a Windows tool to free disk space". So, the software you are looking at is unlikely to be the "Junk Cleaner".
