"Without Within 2 is a narrative adventure with a light sci-fi twist. An enigmatic AI manipulates events on a distant planet to determine the outcome of a war. Throughout the game's events, the player will be able to explore and interact with various systems, unlocking the secrets of the AI and advancing the plot. The game's main theme is about the conflict between nature and culture, and the notions of civilization and enlightenment. Developed by me, Without Within 2 takes inspiration from various art forms, including art history, animation, music, painting, and mythology." Like this game? This is the game that was being made the official theme for this years E3 and it plays like an

adventure game which is pretty appealing to me. I love the retro look of the images and sounds. I hope this game is a success and releases. You can watch the gameplay video here: In the title screen the word "Within" has an easter egg saying something about the character. Another easter egg can be found on the checkered dice. In the aftermath of the 2015 Bihar elections, BJP leader Ram Madhav said in an interview in June last year that he anticipated Narendra Modi would become the next Prime

Minister and that Amit Shah would become the BJP's chief strategist. This was before Varun Gandhi was controversially sworn in as a minister in the Nitish Kumar cabinet and before the latter announced a coalition with the Janata Dal (

- Revenge of the Sith - Spoilers! Film fan Klasse Lalor wrote this excellent review of Episode I - Revenge of the Sith! What a cool film... It's hard to be in a Star Wars movie when the Star Wars movies are desperately dull and so depressing. After four long years of parading the future of Star Wars and Indy IV and George Lucas' many anachronisms, we finally get a decent Star Wars movie. What we finally get is one of the best in a franchise of very mediocre ones. I saw Revenge of the Sith at the cinema with some of my friends and we left the theatre laughing and positively grinning. We had a blast. It is possible to have fun in a movie theatre. After the first few scenes, I became impatient, wanting something to happen. I wasn't alone in not being overwhelmed with impressing sci-fi in that it's predictable what will happen and I know what will happen. But the picture surprised me and was different. It started out as a war-movie, then followed the path of a love-story, but the special effects are the most amazing things I've seen in this movie. "Let the plans" and "It's a trap" were said on command, before the picture had a chance to look bad, knowing that they would have to turn to weapons of mass-destruction. It made me wonder what it would be like to be involved in filming those scenes. I reckon not many of the many employees of George Lucas' rather huge company would, as he does, jump on the set at the slightest little hint, as if he's walking on water. Because on a giant scale yes, "linking to the allies" is easily very different. While you believe that on earth you are in charge there's a 90 per cent certainty that the director, or executive producer, or whatever official title he has, is calling the shots. And if there is someone higher or more important on the ship, well they will also fit a certain part, but not the part the actor who is supposed to be the hero. In Revenge of the Sith, the hero doesn't impose himself, he fits into. He didn't work all this out on his own. The directing was sloppy. Let's put it this way: the people who were in charge don
