For PC, Tablets & Mobile Phones Air Control is a game from the category Strategy Games. Air control matches of aircraft over land, sea or air takes place in an established arena. Each player will be allotted a set number of "planes" and an airfield in which the battle will take place. The object of the game is to destroy the opposing teams planes or to prevent them from doing so. The aircraft are constructed from parts and are currently available in the following kinds: Fighters : They are the main weapon of the air forces, and are often called "cannon". Bombers : They are the hardest aircraft to bring down. Cavalry : Light, fast and at times invisible. Bomber : They are the most superior aircraft in most respects. Modern aircraft : They are costly aircraft and have devastating aerial attacks. The British are most known for their use of this type of aircraft. Bombers : They are light and fast aircraft designed to destroy cities, etc. and carried out aerial bombardment. Modern aircraft : They are the heaviest war planes. They are intended to destroy enemy planes and are equipped with the most devastating weapons. Missile aircraft : Their purpose is to protect the fighters and bombers and to destroy enemy planes.
