Roblox is a game platform that allows users to create their own games. The games are coded in the Lua programming language and designed using "blocks," which let users animate characters and change the logic of games. The games are hosted on game servers and players can play them in a web browser or on mobile devices. Roblox was developed by David Baszucki and Erik Cassel in 2004 and launched in 2006. It's been free to play and supported by Roblox Corporation since then. But, unlike most free to play games, Roblox has also had a virtual currency, Robux, for years. Robux was first made available on the Roblox website and later, to players on mobile platforms like Apple and Android. Roblox allows users to build games and share them with others. Additionally, players can earn Robux by playing games and completing missions. Robux can be used to purchase virtual items in the game such as weapons, clothing, and characters. Since its launch, Roblox has consistently been one of the top 10 free game applications on Apple's App Store, and has more than 200 million monthly active users. Roblox games on the website and mobile platforms have been played more than 1.5 billion times, according to the gaming industry research firm App Annie. How to install: 1.
