ame{shiny} \alias{shiny} \alias{shiny.defunct} \alias{shiny.removed} \title{shiny} \usage{ shiny() \method{shiny}{defunct}(object, deprecate = TRUE)
\method{shiny}{removed}(object) } \arguments{ \item{object}{an \code{shiny} object} \item{deprecate}{should \code{shiny} methods be deprecated and removed from the API?} } \description{ Create or register a shiny object } \details{ This is the old
legacy API, and it can still be used to register a shiny object. This method may be removed in the future if the API is redesigned in the future. \code{shiny()} is a primitive to create a shiny object. \code{shiny.defunct(...)} is deprecated in favor of
\code{\link{shiny}{defunct}} in package \pkg{shiny}. } \note{ \code{shiny.removed(..., quiet = TRUE)} are removed automatically from the shiny namespace when they are accidentally used. This removes the warning from the documentation page. } \examples{
library("shiny")
ui Q: Regex for part of string I need some help with a regex. My string is: www.google.com How do I get from regex this: "" "" "" "" "" If c6a93da74d
