Say hello to Patapon 4, a real-time strategy experience where the music is truly a strong part of gameplay. To experience the island of Samodou more deeply, players will be able to fly over its terrain to understand and feel the landscape and the seasons. Discover new forms of growth and vegetation, and use resources to build foundations and fortifications to defend against enemies. Add new actions to the Patapons based on the seasons, and new behaviors during combat. Players of Patapon might notice changes in the mechanics of combat. Players will take a permanent turn-based move, then will be able to choose to perform one of seven actions as time for a move passes. Immediate actions, such as attacking and using items, will take place at the players discretion with no time constraint. Players can also use special action abilities that are triggered when the Patapons perform a Dance of Hecho, such as attacking a faster rate when the other team makes an attack. Players can also provide support with their own actions, including aiding or incapacitating the Patapons. Also, special attacks that are unique to certain types of Patapons will be available on certain terrain types.

I've been playing this game for a while now and they always add new levels and new creatures. Its been a long time since they added new weapons and also added new characters so its about time they added the Patapon. It would be really cool if they added new sounds and or music. The first is a hack that allows you to level to 100 Patapons faster. You can find it by starting a new game and selecting any Patapon to have it at level 0. A fight will start, and you are immune to damage so you should be able to level it all the way to 100.

Press Up at any point to get the "off" cheat code which will stop the fight. The code is:
