I should mention here that Tales of Arise is a game that has been ported to Xbox One and PS4. But the extra horsepower and extra polish on those consoles does a lot for the game. For example, you have seen the screenshots a bunch of times now, but the Xbox One version of the game will have lush graphics and lighting effects that are beyond anything you have ever seen in a console RPG.

The last question we get to answer is what will he do next? Bandai Namco already has a few big franchises in the Tales series, and because of this I think that one of the most impressive things they've done with Tales of Arise is how they've put together its distinct cast of characters. Whether its the bearded duo that keep running around trying to rob you, the sassy and mystical Celine, the fiery Ran, the fang-toothed Kairi, the five-eyed Freya, or the oddest of the bunch Evangeline. All of their unique personalities and abilities mean that you'll spend more time playing with them than the eight-faced enemy (well, unless its the boss) the game throws at you. Its really something I appreciate, as I hate spending long periods of time in one area or stuck with a one-dimensional character. Each and every one of them are enjoyable to hang out with. That characters be developed beyond "oh, shes the thief thats been following me around for most of the game" or "oh, thats his designer costume" means that the quality of the Tales games continue to rise. It's not quite up there with the likes of Assassins Creed Odyssey, but even with its low difficulty level I find myself getting very attached to the characters in Tales of Arise. While I never take them into battle against very powerful enemies, they seem to be just the right amount of intimidating to have me craving more time with them. I really want to know what happens when I get all of their jobs done. I'd like to say I was genuinely excited to explore new areas and interact with new friends, but that would be lying. 5ec8ef588b
