This one comes in at a lot of different levels. It is a great Android emulator, if youre just looking to try out the standard Android apps on your PC. Its got great performance, so gaming is better than expected. Additionally, its has a good app store to download and install apps from (with a good permissions policy). Its one of the best Android emulators Ive come across, and I recommend it. BlueStacks PC is the only emulator that supports all versions of Android. It doesn't matter if youre looking to run Android 4.0 Ice Cream Sandwich, Android 4.4 KitKat, or Android 5.0 Lollipop. You can start playing Android games with Android Studio and start testing your apps. It runs perfectly on Windows 10 laptops, Windows 7 as well. It feels like youre using a real smartphone on your PC. BlueStacks on Windows 10 is specially optimized for gaming. If you have Windows 7 operating system, it'll deliver smooth gaming experience. ProsCons Very solid emulator Very stable Support for all operating system Optimized for games A powerful PC, a good emulator and Android Studio are required for PC Gaming on BlueStacks. Once all these things are setup, you will love playing Android games on Windows. Imagine playing SimS FreePlay on PC! You can also make use of the cloudwhile playing any game in BlueStacks. ProsCons Support for most Android games Optimized for gaming Faster and smoother play Optimized for Windows 10 5ec8ef588b
