Check if Lightroom is accessible on your computer. If not, download the latest version from this website. If it is accessible on your computer, use the "Display or photo gear" options to select the "Permanently keep this version" plan. If you haven't already, sign in to your Adobe ID. Go to http://my.adobe.com/en_US/lightroom/print-and-publish And on the "File" menu, select "Ruler." If you don't see the Ruler, go to the Lightroom menu bar, tap Tools, and then tap "Adjustment Bar." While the Ruler is displayed, use the bar to zoom in and out to make sure you're in the correct ruler units. Drag the Ruler so that it lines up with the edges of your monitor. View your actual screen and make sure you're not showing more or less space than your monitor should be able to display. Now you have a ruler you can use to precisely edit the areas of a picture you want to touch up. You can also use the ruler to correct perspective by zooming in and out on the subject. If you want the grid lines to have more visual impact when you zoom in, click the Tools icon in the Adjustment Bar. Then click "Line Type." Some of the tools in Lightroom are much like those in the old, fully featured version. But you don't have to use them if you don't feel like it. That saves time and energy, and it's definitely worth considering. These are also the adjustments that Photoshop doesn't help you with. At first, you may feel overwhelmed by all the settings, but consider them one by one and you'll find that some are far less critical than you initially believed. It's true that the complete library of adjustments may seem intimidating.
