Please note that older versions are still available for purchase from the Google Play Store for just \$2.95. find and replace multiple Take all the hassle out of finding and replacing text in multiple files and folders. It's a quick and simple utility that offers you a number of powerful features and a friendly interface. Fast and easy Find and Replace supports all the file types and supports regular expressions. Furthermore, you can scan multiple files at a time. Once you locate the text, you can use the file, folder, drive or search results views. You can also perform multiple searches simultaneously and use the built-in pause or resume. The program provides a handy preview of the search results that allows you to examine it and customize it, if required. Easy and intuitive As you navigate the program, you can see the files being scanned and configured at any time. All you need to do is specify the text and the one to replace it with. Furthermore, you can apply a file filter. Once the search is performed, you can set the view and location of the search results. You can also customize the program to suit your needs, such as the default set of file extensions to ignore. Furthermore, you can add to or remove from the white list of file extensions to ignore. Edit app settings The program offers a number of settings. You can set the window startup position, apply a click action to file open and other things. What's New in Version 1.2.1.1 - bug fixes. Please note that older versions are still available for purchase from the Google Play Store for just \$2.95. Find and Replace A-Z Find and Replace A-Z is a small and lightweight utility that enables you to find and replace text across multiple files at once. It supports all the file types and supports regular expressions. The app is extremely easy to use and will make your search and replace

file find and replace is a small tool that you can use to find and replace text in text documents, excel files, email messages, word docs and other types of files. It is a small, portable and easy to use tool that will find and replace text in multiple files, at the same time. • Supports advanced options: color depth, invert, highlight, lettercase, permissive, ignore files, ignore directories, use as link, use as search, and others. • Options: use binary or regular files as filter, ignore files, directory, use word processing files, use any type of file as filter, use any type of file as search, and others. • Supports standard options: exclude files, search files, find files and replace files. • Import file with file browser, folder view, drag-and-drop and import text. • You can use the tool to search and replace text from anywhere, not just at the current folder. • Scan results show the total occurrences and full path for each file. • Export text to Word, excel, html, text, plain text, csv, rtf, and txt formats. • You can set the main window startup position and default click action, ignore large files, hide tooltip descriptions on options, modify the default set of file extensions to ignore, as well as create a white list for file types. • The tool is pretty light on system performance, running on low CPU and RAM. It did not cause us any issues in our tests, such as freezing, crashing or popping up errors. File Find Replace is a small-sized and portable piece of software that enables users to find and replace text in multiple files at the same time. It comprises standard and advanced options alike to please all user categories. Portability advantages Since there is no setup kit involved, you can drop the program files in any part of the hard disk and just click the EXE to run. There is also the possibility to save File Find Replace to a USB flash disk or other removable storage unit, in order to run it on any PC with minimum effort, as long as it has.NET Framework installed. What's more, the app does not add new entries to the Windows registry or Start menu, leaving the disk clean after removal. Simple and intuitive interface The GUI is friendly, allowing users to import files with the file browser, folder view or drag-and-drop method. All searchable formats are
