Rspmatch Software.zip.Q: Javascript doesn't work in asp.net server control I want to access a javascript function in my asp.net c# code, I have tried accessing it by Button1.Attributes.Add("OnClick", "javascript:Foo()") but nothing happens. Am I doing something wrong? I tried this and it works fine: OnClientClick="javascript:function Foo() { do something }" A: Are you sure you're trying to use the web browser's OnClientClick, and not ScriptManager's client side ScriptManager.RegisterStartupScript function? Either way, make sure your button (and the javascript function, of course) are within the same file. Updated: Found this question, which appears to be exactly what you're trying to achieve... if you'd like to double-check, the code
